DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shingo (JP 10-011194) in view of Kazuyuki (JP 2002-042253).

Re Claim 1: Shingo discloses when a sub-cooking name is inputted simultaneously with the input of the main cooking name, the input of the sub-cooking name is checked with reference to the data check table for executing, if the input is not proper, a notification that the inputted sub-cooking name is an input error (see Abstract). However, Shingo does not disclose any data check table. Kazuyuki discloses a data check table is provided for checking whether a combination of each of a plurality of main cooking names of the main cooking menu and each of a plurality of sub-cooking names of the sub-cooking menu is proper (see Abstract). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify Kazuyuki's invention with Kazuyuki's data check table in order "to facilitate the determination of food to be dished up on a same dish (See Kazuyuki Abstract)."

Re Claims 3-4: Shingo discloses wherein the data of the main cooking menu and the sub-cooking menu are stored in a handy terminal (or in an external database) for inputting a cooking item name to transfer cooking item data thereof to the kitchen (See Abstract).

Re Claims 5-6: Shingo discloses which further comprises an additional report forming part, which is provided in the handy terminal or external database, for statistically collecting the frequencies of transfer of the main cooking menu and the sub-cooking menu to the kitchen (see Abstract).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
